

P4.1

```
syms R_x R_z F_t
B_z = 67; %[N]
B_x = 15; %[N]
F_z = cosd(10)*F_t; %[N] Achilles tendon force in z direction
F_x = sind(10)*F_t; %[N]
```

x-akselin suuntainen tasapaino $-B_x - R_x + \sin(10) * F_t = 0$ (Balance of forces in x-axel)

z-akselin suuntainen $B_z - R_z + \cos(10) * F_t = 0$ (Balance of forces in z-axel)

Momenttitasapaino $0.032m * B_z - 0.026 * B_x - 0.025m * F_x + 0.0044m * F_z = 0$ (Balance of moments in z-axel)
